WSoA Listening Event 7th July 2022

PFA Update

What is working well?

- In-person and virtual stakeholder engagement sessions have been delivered including RMBC and CCG colleagues, representatives from the voluntary sector and young people with SEND (Guiding Voices)
- The Draft Standards and Quality Assurance Framework have been developed. The initial draft has been shared with Garry Parvin and Helen Sweaton.
- Meeting to discuss the initial draft has been arranged for 07.07.2022 and the date for the document to be consulted with will be arranged at this meeting
- Local Offer is progressing – this will have an enhanced PFA landing page.

What we are worried about?

- Scope has widened after engagement- A document has been created to capture this and to assess priorities within the wider scope.
- Feasibility of quality assurance and resources to manage this- A Meeting with the Performance and Business Intelligence teams within Children's and Adults services is to be arranged. The meeting will discuss the best way to capture information and impact.
- The ability to capture a wide range of young people's voices- Activity is being undertaken to look at community groups and services ect where we can capture individual voice as part of the QAF.
- The NTDi PFA standards Gap analysis is taking longer for groups to complete. Input from education e.g. need to ensure Senco is present at Pfthe A board
- Training: building and embedding a PFA training programme – using the framework as a basis and 4 Cornerstones?
- Ensuring PFA becomes a golden thread – adopting the framework will assist

What needs to happen next?

- Discussions with comms and design teams to discuss website accessibility and navigation
- Consultation of standards and Quality Assurance Framework
- Create Councillor update briefing notes
- Meet with Performance and Business intelligence teams and other team members in relation to the QAF to limit duplication of work.
